

<b>FAS Topic Paper (FTP)</b>		
<b>TITLE</b>	<b>REVISION</b>	<b>REVISION DATE</b>
FTP1002 DO-331/ED-218 Annex Tables MB.A-3/MB.C-3 and MB.A-4/MB.C-4 Item Clarification	7	16Aug2018
<b>ABSTRACT/PURPOSE:</b>		
This FTP addresses the ambiguity that currently exists in DO-331/ED-218 Annex Tables MB.A-3 Item #2, MB.A-4 Item #1, MB.C-3 Item #2, and MB.C-4 Item #1. The current wording can be misinterpreted and hence oversimplify the use of simulation.

<i>For internal use only—This paper is based on internal FAS FTP1002 Revision 3</i>		

*Any FAS Topic Papers released by FAS have been coordinated among the members of the FAS group and have been approved by the FAS executive management committee for release.*

*These papers do not constitute official policy or position from RTCA / EUROCAE or any regulatory agency or authority. These documents are made available for educational and informational purposes only*

*The present document was jointly developed by the EUROCAE / RTCA User Group 'Forum for Aeronautical Software' (FAS) and as such remains the exclusive intellectual property of EUROCAE and RTCA.*

*In order to maximize the use of the document and the information contained, the material may be used without prior written permission in an unaltered form with proper acknowledgement of the source.*

### **FAS Team Definition and Goals:**

The FAS user group monitors and exchanges information on the application of the following “software document suite” that was developed by joint RTCA/EUROCAE committee SC-205/WG-71:

- DO-178C/ED-12C - Software Considerations in Airborne Systems and Equipment Certification
- DO-278A/ED-109A - Software Integrity Assurance Considerations for Communication, Navigation, Surveillance and Air Traffic Management (CNS/ATM) Systems
- DO-248C/ED-94C - Supporting Information
- DO-330/ED-215 - Software Tool Qualification Considerations
- DO-331/ ED-218 - Model Based Development & Verification Supplement
- DO-332/ED-217 - Object Oriented Technology and Related Techniques Supplement
- DO-333/ ED-216 - Formal Methods Supplement

The goals of the FAS user group are as follows:

1. To share lessons learned in the use of the RTCA/EUROCAE “software document suite” and to encourage good practices and promote the effective use of RTCA’s and EUROCAE’s publications.
2. To develop FAS Topics Papers (FTP’s) relative to RTCA’s and EUROCAE’s publications or other related aeronautical software industry topics. These FTP’s may include clarification to the “software document suite” or a discussion on a new topic.
3. To identify and record any issues or errata showing the need for clarifications or the need for modifications to the “software document suite”.

The FAS user group does not have the authority to change the content of any approved RTCA/EUROCAE documents. Any publications of the FAS user group may be taken into consideration by a future RTCA/EUROCAE working group.

The text contained in this document is not to be construed as guidance, but is to be used for informational or educational purposes only.

### **Abstract / Purpose of the FAS Topic Paper:**

This FTP addresses the ambiguity that currently exists in DO-331/ED-218 Annex Tables MB.A-3 Item #2, MB.A-4 Item #1, MB.C-3 Item #2, and MB.C-4 Item #1. The current wording can be misinterpreted and hence oversimplify the use of simulation.

### **FTP Discussion:**

The current wording in the “Items” following DO-331/ED-218 Annex Tables MB.A-3, MB.A-4, MB.C-3, and MB.C-4 could be misinterpreted when using simulation as a means of compliance. The intent of the “Item” notes is that referenced objectives are **additional** objectives to be met and not a replacement for the original objectives which contain the “Item” notes.

As an example, the “Item 2” note in Annex Table MB.A-3 does not mean that if simulation cases, procedures and results are reviewed, then Annex Table MB.A-3 objective 1 does not need to be satisfied. Rather, if simulation is used to satisfy Annex Table MB.A-3 objective 1, review of the simulation cases, procedures and results should be performed and those reviews will need to ensure the simulation is fulfilling the original Annex Table MB.A-3 objective 1.

Specifically, the following applies when simulation is used as a means of compliance:

- For Annex Table MB.A-3 Item 2, objectives MB.8, MB.9, and MB.10 should be met in addition to objectives 1, 2, 4, and 7.
- For Annex Table MB.A-4 Item 1, objectives MB.14, MB.15, and MB.16 should be met in addition to objectives 1, 2, 4, 7, 8, 9, and 11.
- For Annex Table MB.C-3 Item 2, objectives MB.8, MB.9, and MB.10 should be met in addition to objectives 1, 2, 4, and 7.
- For Annex Table MB.C-4 Item 1, objectives MB.14, MB.15, and MB.16 should be met in addition to objectives 1, 2, 4, 7, 8, 9, and 11.
